This edition of the *Directory of Criminal Justice Issues in the States* marks the tenth year of this publication. It is designed as a resource of information for policy makers, practitioners, and researchers throughout the justice system. A compilation of efforts carried out by the State Statistical Analysis Centers, the *Directory* describes the programs underway at the State level, the nature of research being conducted, and the publications produced during 1992.

On behalf of the Justice Research and Statistics Association, I would like to thank the Statistical Analysis Centers in the States and Territories for the contributions to this edition of the *Directory*, as well as for the important work that each agency profile reflects. I would also like to express our appreciation to the Bureau of Justice Statistics, Office of Justice Programs, U.S. Department of Justice for continuing to support the publication and dissemination of the *Directory*.

I hope you find this *Directory* useful, and welcome your comments for future reports.

THE JUSTICE RESEARCH AND STATISTICS ASSOCIATION

JRSA is a professional association of criminal justice analysts, researchers, and practitioners committed to providing accurate and timely information in support of sound policy development. Directors of the State Statistical Analysis Centers (SACs) are the only voting members of the Association. JRSA’s goals are to 1) expand the analytical capabilities of State statistical agencies; 2) promote the exchange of information and technology within the criminal justice community; 3) encourage cooperation among the States in addressing common policy-related problems; and 4) facilitate liaison between the States and the Federal government.

JRSA was organized by the States as the Criminal Justice Statistics Association in 1974 as a private, non-profit organization, and became the Justice Research and Statistics Association in November 1991. Funding is provided by grants, contracts, and membership dues. JRSA works closely with the U.S. Justice Department’s Bureau of Justice Statistics and other Federal agencies to promote the effective use of criminal justice information and professional standards for analysts.

JRSA’s programs include 1) a clearinghouse of criminal justice resources in the States; 2) conferences and seminars that cover a wide range of criminal justice issues; 3) training in the use of criminal justice computer technologies; and 4) research and evaluation efforts in the area of drug control and violent crime strategies. Training is conducted both on site in JRSA’s National Computer Center and in selected locations around the country. Topics cover the use of computers for a variety of statistical, graphics, and operational applications, including forecasting criminal justice populations, for which the Association developed a policy-driven projections software called IMPACT.

JRSA’s publications include The JRSA Forum, the Association’s newsletter; grant notes, etc., a bulletin announcing funding opportunities offered through the Office of Justice Programs, and other Federal agencies; and research reports and technical bulletins.

HOW TO USE THIS DIRECTORY

The Directory of Criminal Justice Issues in the States is organized into five sections for easy use.

- Section I contains a brief summary of the SAC research and analysis activities listed in the Directory. It focuses on the major criminal justice policy issues confronting the States in 1992.

- Section II provides a detailed listing of SAC activities including the project title, a brief description, data sources used, date of completion, and a contact person for each SAC activity. The list is organized alphabetically by State to aid the reader in locating a particular State or agency.

- Section III is an index of all SAC activities by issue area. The 38 issue areas found in the index are listed on page 67.

- Section IV provides the reader with a list of criminal justice reports recently published by and available from the SACs.

- The address and telephone number of each Statistical Analysis Center are contained in Section V. The reader may request additional information about research design, findings, and other detailed facts about projects by contacting the appropriate agency and person.
INTRODUCTION

The Directory of Criminal Justice Issues in the States is a resource designed to support criminal justice policy makers, practitioners, and researchers. The Directory indicates, by jurisdiction, many of the justice-related issues and problems examined throughout the country during 1992 by the State Statistical Analysis Centers (SACs). It also summarizes a vast amount of substantive and methodological research undertaken by the SACs in response to these issues and problems.

The Directory is an aid to those who seek to identify sources of State criminal justice information. National policy makers will learn the major criminal justice issues under debate and analysis in the States. State policy makers will gain knowledge about the current activities of other States in dealing with similar issues, problems, and concerns.

Statistical Analysis Centers conduct objective analyses to meet critical planning needs and address statewide and systemwide criminal justice policy issues. These agencies contribute to viable, effective policy development through statistical services, research, evaluation, and policy analysis. The SAC program originated in 1972 as a component of the National Criminal Justice Information and Statistics Service (NCJISS). Although some SACs are predominantly funded by their States, they continue to maintain a close working relationship with the U.S. Department of Justice, Bureau of Justice Statistics, which supports special research and analysis activities. Since the advent of State funding, many of the agencies have changed their names. To maintain consistency when discussing these agencies in the Directory, however, the generic term Statistical Analysis Center (SAC) is used.

In 1983, the Justice Research and Statistics Association (then called the Criminal Justice Statistics Association) first surveyed the SACs on the types of research and analytical activities in which they were involved and developed a computerized index to State activities in criminal justice. The index, called Computerized Index to Data Sources or "CIDS," contains information on SAC research, analyses, and other activities as well as SAC reports and publications. Information from CIDS was first published in 1984 in the Directory of Criminal Justice Issues in the States, which has been published annually since then. This is the tenth edition of the Directory, which continues to serve as a guide to criminal justice programs and policy research conducted by the SACs.

CIDS now contains information on SAC activities from 53 States and territories. This Directory is a summary of the 1992 activities and publications of the SACs.
THE MAJOR CRIMINAL JUSTICE ISSUES IN 1992

Public policy development requires reliable information. During this era of dwindling resources for all levels of government, it is especially important that decision makers receive accurate and reliable information when targeting criminal justice programs for the allocation of scarce funds. The SACs perform a critical role in public policy development by providing decision makers with information on crime and criminal justice data as well as substantive policy options.

Each year the SACs report on the criminal justice issues in which they are involved. An analysis of the issues addressed by reported SAC activities across the nation reveals that certain issues are predominant. These issues span the entire criminal justice system and include police, courts, and corrections as well as juvenile delinquency, recidivism, and substance abuse. The following table presents issues studied by the SACs and the number of States involved in each one from 1990 to 1992.

SAC research activities reflect some of the most critical criminal justice issues in the nation. Five of the top issue areas in which SACs conduct the most activities relate to sanctions for offenders: corrections, sentencing, probation, alternatives to incarceration, and jail. This is indicative of national concern over the increasing growth of the correctional population in the United States. The SACs are evaluating the best ways to handle their State's correctional populations, while trying to find appropriate solutions to the problems of substance abuse and increasing violence. SAC projects in the sanctioning area included projecting the impact of criminal justice policy on prison populations, evaluating programs, developing and managing jail information systems, and reporting correctional statistics.

As has been true for several years, the issue area Police received more attention from the SACs than any other. Projects performed by the SACs in this area continued to follow the trend set by the States which have spent most of their Federal funding on law enforcement task forces. Some activities made possible through the Edward Byrne Memorial State and Local Law Enforcement Assistance Program included task force implementation and evaluations. The SACs also were involved in evaluating police programs, developing a street violence early-warning system, and analyzing police behavior.

The issue of Drugs received a lot of attention from the SACs, whose activities ranged from development and evaluation of drug enforcement strategies to reporting statistics and administering the drug use forecasting program and public opinion surveys. The number of SACs working on projects in the area of Victims surged from 14 in 1991 to 26 in 1992. Representative of growing national attention towards the victims of crime. The States are focusing more resources on victim-related activities including performing homicide and victimization studies as well as providing staff support to task forces on sexual assault and domestic violence.

Because SACs address the primary concerns of criminal justice decision makers, SAC activities provide an indication of the most critical issues facing the criminal justice system. The following table provides a quick summary of the issues in which each State SAC is involved.
The content areas noted for each SAC include not only the 1992 activities listed in the directory, but additional areas of expertise as well.
ACJIC Newsletter
The Newsletter examines topics of interest to sheriffs and police departments. This resource emphasizes the National Crime Information (NCIC) terminal standards and usage, but includes information on the components of the Alabama Criminal Justice Information Center (ACJIC).

Data Sources: UCR/IBR, CCH, Police Departments, NCIC
Date of Completion: Continuing Activity
Agency: Alabama Criminal Justice Information Center

Suite 350  
Montgomery, AL 36130  
**Contact:** Myrl Ramsey  
(205) 242-4900

**Preliminary Report on Index Data**

After the yearend index data are sent to the FBI, a preliminary report containing only statewide information is produced to inform the State about offenses and clearances prior to publication of the annual report (circa July).

**Data Sources:** UCR/IBR  
**Date of Completion:** Continuing Activity  
**Agency:** Alabama Criminal Justice Information Center  
770 Washington Avenue  
Suite 350  
Montgomery, AL 36130  
**Contact:** Carol Cobert  
(205) 242-4900

**Sector Breakdowns of Crime**

Sector breakdowns can be done for any police agency using Incident/Offense reports and sector numbers. The sector reports (1) inform administrators about where crime occurs and (2) include crime breakdowns by time of day and day of the week.

**Data Sources:** UCR/IBR, Police Departments  
**Date of Completion:** Continuing Activity

Suite 350  
Montgomery, AL 36130  
**Contact:** Therese Ford  
(205) 242-4900

**Training Courses on the PC for Incident Reporting (UCR)**

ACJIC developed a PC program for MS-DOS-compatible computers with hard disk to enable agencies in the field to report local crime data via diskette rather than by paper. This program allows agencies to maintain local databases of their crime statistics and is available to any agency upon request. A training course was developed to assist local agencies in the use of this program.

CALIFORNIA

Adult Criminal Justice Statistical System (ACJSS)
ACJSS describes dispositions that occur at any point in the criminal justice system following the arrest of an adult. The system provides annual data for California’s Offender-Based Transactions Statistics (OBTS) system and for an experimental longitudinal file containing criminal history information on persons whose first arrest occurred on or after January 1, 1973. Data are published annually in Crime and Delinquency in California and in the Criminal Justice Profile series.

Data Sources: Courts, Prosecutors, Police Departments, Corrections Department, Sheriffs Departments

Date of Completion: Continuing Activity
Agency: Bureau of Criminal Statistics and Special Services
Post Office Box 903427
Sacramento, CA 94203
Contact: Myrna Naughton
(916) 227-3537

Advance Release: Crime And Delinquency in California (Prior Year)
A brief report is released in advance of the annual report on Crime and Delinquency in California. Information is published for the prior calendar year on the Bureau of Criminal Statistics’ (BCS’) major database files. This advance release of data each May meets statutory obligations to report crime and delinquency information by July 1.

Data Sources: UCR/IBR, MACR, OBTS

Date of Completion: Continuing Activity
Agency: Bureau of Criminal Statistics and Special Services

Adult Probation Statistical System
The Adult Probation Statistical System contains data on convicted defendants under county probation supervision, including information from the time of court orders at judgement to the time of probation termination. The system contains only gross counts, thus providing only profile information by county, types of placement, reasons for removal, and caseload. These data are published annually in the Crime and Delinquency in California and Criminal Justice Profile series.
BCS Preliminary Report: Crime in Selected California Law Enforcement Jurisdictions

The SAC publishes preliminary crime counts reported by California law enforcement agencies serving populations of 100,000 or more. Information is published semi-annually for the January-June period (published in August), and the January-December period (published in February). Each report presents a 2-year comparison.

Development of a White Collar Crime Index

This is the second of two reports by Martin Forst (California State University, Sonoma) addressing the measurement of white-collar crime through data collected from regulatory agencies. In the study, the author offers a prototype of a white-collar crime index and a discussion of some key issues which were encountered in the development of that index.

Domestic Violence-Related Calls for Assistance

As of January 1, 1986, the California Legislature required statistical reports to be submitted to identify the extent of domestic violence in California. Data elements include the number of domestic violence-related calls for assistance and information on weapon use by type (i.e., firearms, knives or cutting instruments, other dangerous weapons, and personal weapons). The data are published in the annual Crime and Delinquency in California and Criminal Justice Profile.

Full-Time Law Enforcement Personnel Survey

This 1-day survey report is used by both the California Department of Justice and the FBI to compile annual statewide and national statistics on the number of full-time sworn and civilian law enforcement employees. Data elements include full-time sworn officers (including chiefs or sheriffs), full-time civilian employees, and total full-time law enforcement employees. Each data element is subdivided by sex and total number employees. The data are published in Crime and Delinquency in California and Criminal Justice Profile publications.

Homicide in California

This report is published annually and provides an overview of homicide and its victims, information on persons arrested for murder, and a review of the criminal justice system's response. It includes information on the death penalty; the number of peace officers killed in the line of duty and the events that led to their
Measure White Collar Crime in Depository Institutions

Martin Forst of California State University, Sonoma collected data from agencies regulating depository institutions to study the incidence of white-collar crime within those particular institutions. The report discusses the range and pattern of the crimes, amounts taken, offender profiles and the importance of using regulatory data in criminological research.

Measuring White Collar Crime in Depository Institutions

This database contains detailed information about the circumstances of each reported homicide in California. Data elements cover personal characteristics of victim; location, date, and time of homicide; means of death; precipitating event; and victim's relationship to suspected offender. Annual publications Crime and Delinquency in California and Criminal Justice Profile contain an overview of these findings, but a more in-depth analysis is available in the Homicide in California report. The data is also forwarded to the FBI for inclusion in their annual publication Crime in the United States.

Colorado Criminal Justice Commission

Effective July 1, 1989, the Division of Criminal Justice (DOJ) was legislatively mandated to
staff the newly created Colorado Criminal Justice Commission. A working structure of subcommittees was developed to facilitate fulfillment of the Commission's charge to "provide a legislative overview of and a study of . . . [Colorado's] criminal justice system . . . and to develop recommendations for legislation improving the . . . criminal justice system." The Division is responsible for providing staff support as well as training and resource materials, and for conducting research and policy analysis. Efforts to fulfill the mission of a Commission-sponsored summit on "Early Prevention of Crime in Colorado" continue through the work of a committee dedicated to implementing a summit-generated proposal to demonstrate how a community can build a crime-free generation through a comprehensive, 20 year commitment. In 1992, four pilot model communities and four associate model communities were selected to participate in the build-a-generation program.

**Drug Data Collection**

The SAC collects data from district court felony cases. The sample for 1991 data was selected from convicted felony cases sentenced in 1990. No data was collected in 1992. Data will be collected in 1993 from a sample of cases filed in 1992 in nine judicial districts. These districts represent 78% of the felony cases filed and 85% of the State's population. Data include offender demographics, offender needs, juvenile and adult criminal histories, charge and conviction offense information, sentencing and placement information, and victim information if the conviction offense is violent. Beginning with convicted cases sentenced in 1989, additional drug offense data have been collected. These data include, for both charge and conviction, a description of the offense, and the type and quantity of the drug(s).

**DCJ Bulletins**

Two-page bulletins are published periodically to report the results of court database analyses, public opinion surveys, classification/risk assessment studies, jail studies, and so forth. Each bulletin addresses a single issue, such as the 1990 Drug Use Forecasting Report (September, 1991) and Inmate Population Growing Faster than Expected: Build More Prisons or Change Policy?

**Data Sources:**
- OBSCIS, Jail Information System, Probation/Parole, Corrections Department, Courts, Survey

**Drug Use Forecasting (DUF) - Adult and Juvenile**

The Drug Use Forecasting program is funded by the National Institute of Justice. The project involves quarterly surveys and urinalysis of recently arrested adults and juveniles. Currently, there are 28 cities throughout the United States participating in the adult DUF program and 12 participating in the juvenile program. DUF provides the cities with timely information about changes in drug use trends, thus allowing them to target their treatment and prevention money more effectively.

**Implementing and Monitoring Parole Guidelines in Colorado**

The SAC was mandated by the State legislature to staff the Colorado Parole Guidelines Commission and develop and validate an actuarial risk scale for Colorado inmates. The guidelines, which include the use of the Colorado Risk Assessment Scale, have been developed and are being implemented by the Parole Board and the Department of Corrections. Implementation training is provided by the SAC. In 1992 the SAC collected data on approximately 5,000 Parole Board decisions and reported the findings to Colorado legislators and criminal justice system policy makers.

Juvenile Intensive Supervision Probation Pilot Project: Phase One Study

This study describes nearly 400 juvenile cases processed in six Colorado judicial districts which were pilot sites for juvenile intensive supervision probation programs established in compliance with legislation enacted by the Colorado legislature in 1991. The purpose of this research was to describe the juveniles and the placement decision making process and, in particular, (1) to document the extent to which juveniles in the pilot programs met the judicial department's JISP Program Guidelines, and (2) to describe differences among youth placed in JISP, regular probation, and those receiving sentences to Department of Institutions placements.

Report on Impact of Legislation

The SAC provides impact analyses to legislators and to special and standing legislative committees on criminal justice issues. Included are population projections, prison capacity estimates, system capacity estimates, cost estimates, and related study reports.

Data Sources: UCR/IBR, OBSCIS, Jail Information System, Probation/Parole, Juvenile Information System, Corrections Department, Courts, Survey, CCH

Criminal Sanctions for Family Violence Offenders

The SAC will be working on a joint project with the Judicial Branch to develop and evaluate criminal sanctions for family violence offenders at a pilot site. The project will focus on three areas: develop assessment and screening tools, design education and treatment modules to enhance existing alternative sanctions, and design and test an evaluation instrument for the program’s impact.

Data Sources: Courts, Community Corrections, Victims Advocacy Groups, Public Safety

Computer Simulation of Criminal Justice System Processing

Working with analysts from the Department of Corrections, State Police Crime Analysis Unit, Judicial Information System, and the State Prosecutor’s Office the SAC is developing a new criminal justice system model utilizing IMPACT software.

Data Sources: UCR/IBR, Corrections Department, Courts, Prosecutors, Connecticut Census Data Center

Criminal Justice Information System Technical Subcommittee

The SAC Director coordinates this subcommittee's activities which are advisory to the Criminal Justice Information System Policy Board. Current projects include working with consultants to design and develop an implementation plan for the State's integrated, offender-based information system.

Data Sources: Courts, Corrections Department, Police Departments, Prosecutors, UCR/IBR
The Director of the Connecticut SAC serves as director of a project which will enable the electronic transfer of data between the Judicial Department and the SPIBI, and expand the Master Name Index to allow quicker identification of case information. This project is being extended to provide for the rewrite of the existing criminal history database to eliminate inaccurate and non-fingerprint supported records. The SAC is also coordinating other grants and projects that will make additional improvements throughout the criminal justice information system.

**Drug Traffickers’ Criminal History Profile**

This report compares the criminal history profiles of offenders incarcerated under Delaware’s 1989 Drug Trafficking law. This law provides for a three-year minimum mandatory sentence for possession of five grams of illicit drugs. Offenders incarcerated for drug trafficking are compared with offenders incarcerated for other serious felony crimes such as robbery and possession with intent to deliver illicit drugs. The number of prior incarcerations, detentions, and arrests are utilized as data for this study. On average drug traffickers have a less serious criminal history profile than other offenders have for comparable crimes.

**Data Sources:**

**Date of Completion:** 06/1992
**Agency:** Delaware Statistical Analysis Center
**Address:** 60 The Plaza, Dover, DE 19901
**Contact:** Jack P. O’Connell (302) 739-4846

**Delaware Drug Success Indicators**

This report summarizes the history (from 1984 to 1991) of key criminal justice indicators of the illicit drug problem in Delaware, including those relating to drug arrests, detention and incarceration, and the types of drugs examined by the Medical Examiner’s Office. The impact of drugs in Delaware is measured by drug deaths, the incidence of drugs in pregnancies, emergency room incidents, and self-reported use of drugs by 11th graders. The availability of State-funded adult and juvenile drug abuse treatment is also reported.

**Contact:** Jack P. O’Connell (302) 739-4846

**Eastside Substance Abuse Awareness Program Evaluation**

The second report shows that of the 90 areas in Wilmington, street drug activity increased from 17 areas in 1988 to 22 in 1990, and to 24 in 1992. Four of the areas in the city have become saturated with open drug sales—that is, police are unable to curb the problem with existing methods. Some of the 1990 gains were lost in the Eastside neighborhood during 1991. In other parts of the city, however, new community policing efforts have curbed the drug problem.
Impact of the New Drug Trafficking Law on the Delaware Criminal Justice System

This report studies the effects of Delaware's 1989 drug trafficking law, under which the possession of 5 grams of cocaine or another dangerous drug results in a 3-year mandatory minimum sentence. Weights for seized drugs from the Medical Examiner's Office, arrests, detention, jail and prison admissions, and sentence lengths are the time series measures used to assess the impact of the law on the criminal justice system.

Jail and Prison Population Forecast

Jail (less than 1-year sentence) and prison (more than 1-year sentence) population projections are calculated using a "components of change" methodology that forecasts by sex and type of crime. Criminal justice officials establish the assumptions for the forecast. In the 1993 forecast, there was special emphasis on the transition to Delaware's new Truth in Sentencing Law (determinate sentencing) and SENTAC structured alternative punishments. The populations, admissions, and time are monitored quarterly.

Juvenile Incarceration and Alternative Sanction Population Forecast

Delaware juvenile justice system is reviewing its sentencing philosophy and process. Much analysis and debate have been focused on the uses of secure incarceration in relation to a hierarchical set of alternative sanctions. This juvenile offender population forecast shows the anticipated future population that would be in secure and alternative settings until the year 2002. A detailed review of 1992 cases by the prosecutor, public defender, the family court, and youth rehabilitation administrators served as the basis for the population forecast assumptions.

Mandatory Sentencing Study

With special funding from the Edna McConnell Clark Foundation, the SAC is studying the impact of mandatory sentencing on the criminal justice system and is reviewing and classifying all State statutes. Those statutes that are frequently used will be examined in a time frame.
series analysis to assess their impact on the system and their effectiveness for reducing targeted crimes. This report will be published in 1993.

**Academically Speaking ... Criminal Justice-Related Research by Florida's Doctoral Candidates**

This document is an annual publication of the SAC. The report contains articles based on the dissertations of doctoral degree recipients at Florida's colleges and universities.

**Data Sources:** Colleges and Universities

**Date of Completion:** Continuing Activity

**Agency:** Florida Criminal Justice Executive Institute

**Contact:** Diane Zahm
(904) 487-4808

**Charting the Course**

*Charting the Course* is a compilation of the research work produced by participants in the Florida Criminal Justice Executive Institute's nineteen month Senior Leadership Program. The program offers a futures-oriented view of criminal justice, and is designed to prepare upper-level managers in law enforcement, corrections, probation and parole, and prosecution for successful leadership roles.

**Data Sources:** UCR, CCH, Survey, Police Departments, Sheriffs Offices, Courts, Corrections

Computerized Criminal Investigative Task Force Support

Analysts and programmers are assigned to ad hoc task forces to provide on-site computerized criminal investigative support for major cases. All products of these efforts are formatted and coded for entry in a special database.

Data Sources: CCH, Jail Information System, Corrections Department, Courts, Prosecutors, Police Departments, Case File Summaries, Polygraphs, Officer Records

Date of Completion: Continuing Activity
Agency: Georgia Crime Information Center
Post Office Box 370748
Decatur, GA 30037-0748
Contact: Ronnie Seay
(404) 244-2748

General Computerized Criminal Investigative Support

Analysts produce ranked listings of possible suspects or vehicles involved in high priority investigations by State and local law enforcement agencies.

Data Sources: CCH, AFIS, OBSCIS, Police Departments, Prosecutors, Sheriffs Departments, State Motor Vehicle Files

UCR Reporting

Data sets have been developed for statewide use of a summary-based reporting system of monthly tallies from local law enforcement agencies to be compiled for the UCR program. Output reports are produced on request, for example, for specific time periods (by year and by month), and by type of crime. These data are published annually in a report entitled Georgia Criminal Justice Data.

**Cost of Justice in Illinois**

Authority staff collect, compile, and maintain the Illinois Cost of Justice Data Set, which includes annual information beginning in 1970 on expenditures, employment, sources of funds, and activity levels by level of government (local, county, State), and by specific function (law enforcement, courts, corrections). Staff use the data set to analyze the relationship between activity levels and resource levels and to respond to numerous requests from Illinois agencies and policy makers.

**Data Sources:**
- Corrections Department, Courts, Jail Information System, Police Departments, Probation/Parole
- Prosecutors, Sheriff
- Departments, Survey, IL
- Comptroller’s Office
- Expenditure Data, BJS, National Financial Data, State Agency
- Budget Data, Bureau of Labor

**Criminal Justice Information Requests**

The Information Resource Center (IRC) serves as a clearinghouse to criminal justice administrators, other agencies, and the public for data or statistics, reports, referrals, and general information related to the criminal and juvenile justice systems, particularly in Illinois. IRC staff handle approximately 50 requests for information and statistics per month. The Center also provides technical assistance in the interpretation and utilization of criminal justice data and maintains a reference library.

**Data Sources:**
- UCR/IBR, Jail Information System, Probation/Parole, Juvenile Information System, Corrections Department, Courts, Police Departments

**Data Infrastructure—I—UCR Data**

This project is improving the quality and availability of I-UCR Data for Criminal Justice Decision-Making in Illinois. "I-UCR Data" include: Offense, Arrest, SHR (Supplemental Homicide Report), Police Officers Killed or Injured, and Property Detail files, from CPD and from ISP, for the years 1972 through the current year (now working on 1991). The Project team is accomplishing its goals by investigating data...
quality problems; archiving and creating summary databases; creating a county-level Geo-Archive; and handling requests for technical assistance in accessing or using.

### Drug Information and Analysis

With the help of Federal funds, a Drug Information and Analysis Center (DIAC) that focuses exclusively on drug-related data collection and research was created within the Authority's research and analysis unit in 1990. The primary responsibility of the DIAC is to proactively develop, collect, analyze, and disseminate aggregate statistical information on the extent and nature of the drug problem and the justice system's response to it.

**Data Sources:** Courts, Corrections  
Department, Health Related Facilities, Police Departments, Probation/Parole, Prosecutors, Sheriffs Departments, Survey, UCR/IBR, Crime Labs

### Drug Program Evaluation

The Information Resource Center (IRC) is responsible for a multifaceted evaluation initiative aimed at assessing the implementation and impact of drug control and system improvement programs in Illinois. Multiple evaluation projects supported with Federal funds are carried out by internal IRC staff or through subcontracts with outside organizations. For those evaluations that are subcontracted, the IRC identifies the specific programs to be evaluated; develops and issues solicitations (Requests for Proposals) for the evaluation research; oversees the proposal submission and peer review processes; negotiates subcontracts; and monitors the progress of the research. Projects that are operational include (1) University of Illinois at Chicago's evaluation of community policing in Joliet and Aurora, Illinois, and (2) Southern Illinois University at Carbondale's evaluation of nuisance abatement in Cook County. For those evaluations that are conducted internally, IRC staff develop the research design and conduct the work in its entirety, including the evaluations of the St. Clair County Drug Testing and Services Program and the Cook County Adult Probation Home Confinement/Drug Surveillance Program.

### Early Warning System for Street Gang Violence Areas: Automated Hot Spot Identification

The Illinois SAC has recently received a grant from the Bureau of Justice Statistics for a cooperative project between SAC staff and Police Area Four, a high-homicide police district in Chicago. The research proposal began as a request from Commander Maurer of Area Four for SAC staff to use both their expertise in homicide research and the SAC's Spacial and Temporal Analysis of Crime (STAC) hotspot area mapping software to reduce levels of serious violence and homicide in the neighborhood. The project will develop an automated early warning system for law enforcement that will identify potential neighborhood crisis areas that are at high risk for experiencing a "spurt" of serious street-gang-related violence and homicide. This early warning system will be based on a statistical model that consolidates spatial information obtained from a variety of sources and uses automated hotspot area identification and other geographic statistics as tools to target crisis neighborhoods. The project will then organize and document the early warning system and the "geoarchive" database that supports it to serve as a prototype for application in communities throughout the Nation.

### Homicide Research

Through the Criminal Justice Archive, the Chicago Homicide Project of the Illinois SAC maintains and disseminates a 25-year (1965-90) data set of over 18,500 homicide cases in Chicago. The Homicide Data Set also includes consistently defined drug- and street-gang-related data for all 25 years. The Authority continues to handle numerous requests from legislators, city and national researchers, and policy makers for analysis of this data set. In addition, the Illinois SAC has developed the Victim Level Murder (VLM) file, which corrects a basic problem in Supplementary Homicide Report data. The VLM for Illinois (incident level) is available through 1989 and additional years will be added as they become available. SAC staff have published numerous reports, journal articles, and a book based on analyses of these data, and more work is in progress.

### Information System Technology

Through its Information Systems Unit, the Authority seeks to identify the most efficient and cost-effective hardware and software available to meet criminal justice agency needs including the needs of Authority staff. This effort includes technology research, system development, system support, and technical assistance.

**Date of Completion:** Continuing Activity
to make data entry easier and to calculate and search for and identify hotspot areas of dense activity (described by a standard deviational ellipse) enclosing the densest areas). The STAC System (PIMS) is an automated information system designed to provide accurate and useful information to investigators, managers, and other decision makers in small to medium-size police departments. The system maintains data on arrestees and calls for service and provides automatic reporting for Uniform Crime Reporting (UCR), access to State and national criminal justice data systems, and on-line data searches. Computerized mapping, crime analysis, and interface with mobile data terminals are also supported. Developed and operated by the Illinois Criminal Justice Information Authority, PIMS constitutes a significant enhancement of police analytical and tactical tools and could facilitate more strategic deployment of police resources.

**Police Information Management System (PIMS)**

The use of a common questionnaire and methodology will provide a database for a significant part of the Nation's north-central region.

**Methods for Geographic Crime Analysis**

The purpose of the liaison is to make contact with various city, county, or State agencies or organizations that require or can utilize criminal justice information in their work. The liaison distributes policy information to these non-criminal justice agencies and makes presentations to them at annual conferences or other scheduled meetings.

**Statistical Methods for Time Series Analysis and Projections**

For more than 10 years, the Illinois Criminal Justice Information Authority has conducted research on practical issues in time series analysis and forecasting in criminal justice. The Authority has published numerous reports, including How to Handle Seasonality: Introduction to the Detection and Analysis of Seasonal Fluctuation in Criminal Justice Time Series; Is Crime Seasonal?; Guide to Pattern Description of Time Series; and Is Crime Predictable? The SAC developed Time Series Pattern Description (TSPAT), a software package used in criminal justice agencies across the country that is a tool for initially exploring time series data and communicating the results to a general audience. Working with the staff of the Cook County Jail, the SAC used IMPACT to estimate the size of the jail population if the jail bond program, which releases inmates on recognizance, had not been in effect; there are two forthcoming reports on this issue. The Illinois SAC publishes annual forecasts of offenses and arrests (by area of the State, age group, and specific crime type), and is currently conducting an evaluation of projection methods to determine if it is possible to increase the accuracy of these predictions. In addition, SAC staff handle frequent requests for help, give advice on time series and forecasting issues, and teach courses and workshops.

**Data Sources:** Corrections Department, Courts, Health Related Facilities, Jail Information System, Police Departments, Probation/Parole, Prosecutors, Sheriffs Departments, Survey, UCR/IBR, Any Time Series
Task Force on Crime and Corrections

The Governor has appointed a 28-member task force to assess the current and future problem of crowding within the State's correctional system and to make a series of programmatic and policy recommendations to alleviate that crowding. The primary work of the task force was completed in December 1992. Staff of the Authority have been requested to provide statewide and national crime and correctional information to promote the work of the task force. In particular, staff are required to define the nature and extent of the problem and to analyze potential intermediate sanctions for appropriateness and impact. Work was completed as of March 1993 when the Illinois Task Force on Crime and Corrections Final Report was published. ICJIA is continuing a public information program to advise callers on the updated status of the recommendations.

Trends and Issues: Criminal & Juvenile Justice in Illinois

Trends and Issues is an annual publication of the Authority and contains information on all components of Illinois' criminal justice system. The focus of the book is on past and future trends in the system and on current issues. The 1990 edition focused on how the criminal justice system in Illinois is financed, and the 1991 edition focused on the relationship of educational and criminal justice systems in Illinois. There was no 1992 edition due to agency funding restrictions. The 1993 edition will focus on gangs and youth violence.

Indiana

Analyzing School Drug-incident Data

In January 1989, legislation was enacted requiring public school corporations to report information to the State about drug incidents occurring within 1,000 feet of school grounds. Since then, over 1,500 incidents involving the possession, consumption, or dealing of alcohol and drugs have been reported by Indiana school officials. The Institute continues to analyze data from these reports to learn more about the prevalence of drugs in Indiana schools and the types of disciplinary actions recommended by school authorities for various drug incidents.

Tracking Juveniles Released from Indiana Boys' School

At the request of the Correctional Task Force on Juvenile Institutions, the Institute conducted a study on juveniles released from the Indiana Boys' School (IBS). The primary purpose of the study was to determine the extent to which juveniles released from the IBS reincarcerated as measured by their subsequent incarceration in the juvenile or adult corrections systems and jails in the State. Another purpose was to provide members of the task force with summary information about juveniles incarcerated at the IBS and the types of programming they received while incarcerated. The study involved (1) gathering demographic, social history, offense history, and institutional programming data for a sample of 382 juveniles released from the IBS over 5 fiscal years, from 1984-85 through 1988-89, and (2) tracking their subsequent contact with the corrections systems and jails in the State.

IOWA

Child Abuse Intervention Quality Assurance Program

This program involves the collection, analysis, and reporting of information regarding the effectiveness of investigative, judicial, and administrative handling of child abuse cases in Iowa. The program also involves the development and implementation of a plan for an ongoing research effort using longitudinal data from the State's child abuse registry and other automated data systems. A report assessing factors related to placement decisions in severe abuse cases is scheduled for September 1993.

Data Sources: CCH, Corrections Department, Courts, Health Related Facilities, Juvenile Information System, Probation/Parole, Prosecutors, Survey, Child Abuse Registry, Public Hearings
Date of Completion: Continuing Activity

Correctional Policy Project - Sentencing

Under the direction of its Criminal and Juvenile Justice Planning Advisory Council, the Iowa SAC is conducting various analyses to help prepare the State for potentially extensive changes in Iowa's sentencing laws and practices. The SAC's studies are used by the Council to develop recommendations for changes in correctional policy. An Intermediate Criminal Sanctions Task Force was established by the Iowa General Assembly at the recommendation of the Council. This Task Force is being staffed by the SAC and will issue a report of its activities and recommendations in June 1994.

Computerized Criminal History (CCH) Records Audit and Technical Assistance Project

In cooperation with the Iowa Department of Public Safety, this project is underway to assess and improve the completeness and accuracy of Iowa's CCH files, with particular attention given to the system's ability to identify felony offenders. The Iowa Department of Corrections and the State Court are also involved with Public Safety and the efforts to improve its CCH through a multiagency assessment of policies and procedures and interfacing of various automated data systems.

Criminal and Juvenile Justice Planning Advisory Council Support

Ongoing policy analysis and issue-specific research are conducted to assist this statutory council as it carries out its planning and data coordination activities.
### Disproportionate Incarceration Rate of Minority Youth in Secure Facilities

This project will include a collection of race-specific data from a variety of sources to describe minority overrepresentation in (1) delinquency proceedings and (2) placement in shelter care, detention, the State juvenile home, State training schools, and mental health facilities. A series of town meetings will be held, and the Iowa SAC will be working with a number of local service projects to develop model programs that can be replicated in Iowa and across the nation.

### Drug Control Strategy Performance Indicators

For this project, the Iowa SAC assists in the collection, maintenance, and reporting of statewide, multiagency data identified as key indicators of the effectiveness of the State’s drug control strategy. The SAC is working (1) to develop databases, methodologies, and report formats that facilitate the collection, maintenance, description, and analysis of those indicators, and (2) with the Iowa Governor’s Alliance on Substance Abuse to ensure that the resulting analytical reports are of relevance to the State’s planning needs.

### Prison Inmates Substance Abuse Treatment Needs Assessment Project

This research and demonstration project is designed to determine the substance abuse treatment needs of adult offenders serving prison sentences in Iowa. During the project period, a sample of all incoming inmates will be subject to an in-depth needs assessment developed for this project and conducted by certified substance abuse counselors who are not prison staff. Data from the assessments and other offender-specific information will be collected and analyzed to help the Iowa Department of Public Health and the Iowa Department of Corrections plan future treatment service interventions.

Computer-Based Forecasting Policy Simulation Models

To support the SAC's extensive policy analysis responsibilities, the agency has obtained or developed several forecasting and simulation technologies. The technologies currently in place include: (1) Correctional System Simulation Model (mainframe - Monte Carlo discrete event); (2) Structured Sentencing Simulation (PC - Monte Carlo); (3) JUSSUM II (mainframe - linear branching); (4) IMPACT (PC - aggregate); (5) Community Corrections Planning Model (PC); and (6) Corrections Components of Change Model. A juvenile corrections Monte Carlo discrete event model is currently under development.

Correctional Simulation/Policy Impact Project

A comprehensive correctional system simulation model (State and parish prisons, probation, and parole) was developed and went online January 1, 1986. The purpose of this project is to attach policy impact statements to all proposed policy and statutory changes relative to operational costs, program changes, numbers of inmates affected, and construction. These impact statements are presented to legislators and policy makers as they consider relevant changes.

Criminal History Improvement Program

The SAC, in cooperation with the Bureau of Identification (State police) and the Supreme Court, is developing an integrated approach to the problem of criminal history reporting. This project involves the redesign of the State CCH system, the procurement of a new statewide AFIS, as well as the linkage of LIBRS and the State court information system to the State CCH. This design will ultimately result in a CCH system which meets or exceeds Federal requirements, and which provides informational linkages for both State and local corrections which did not previously exist.

**Minneapolis Arrest Projections**

The SAC projects arrests in Minnesota using 1990 census data.
Anti-Drug Abuse Act Narcotic Control Program Support Services

The SAC provides information and research support services to the Missouri Department of Public Safety in administering the Narcotic Control Program under the Anti-Drug Abuse Act of 1986. The SAC will continue to (1) work with other State and Federal agencies to collect and interpret data to provide Missouri public officials with a better assessment of Missouri’s drug problems and (2) assist in promoting the development of effective policies and programs designed to address those problems. The SAC is developing a publication entitled Missouri’s Illicit Drug Problem, which will assess the drug problems in the State and describe the Missouri criminal justice system’s response to those problems.

MULES Missing Person Project

The SAC developed a program to retrieve data from the Missouri Uniform Law Enforcement System (MULES) on all missing persons reported to law enforcement agencies. The first report used these data for an empirical analysis of all missing person cases active in the system in 1984. Programs were developed to produce monthly and annual missing person and children reports that are provided to the Missouri State Highway Patrol's Missing Children's Unit. The SAC produced a second report on Missouri's missing person cases active in MULES from 1985 to 1988. A third report detailing Missouri's missing person cases active in the system from 1989 to 1991 also has been produced.

Offender Management Information System (OMIS)/Criminal History Records System Interface

The SAC annually updates the OMIS client statistical databases at the request of the Department of Corrections. The Department provides the SAC with personalized OMIS databases describing institutionalized clients. The SAC examines the Missouri CHRS databases, summarizes the clients' criminal history data, attaches that summarized data to the clients' OMIS records, and depersonalizes the records. The updated OMIS client statistical databases are
The information system contains data on traffic accidents in Missouri and is used by the SAC to produce numerous reports and studies requested by traffic authorities and public officials. The SAC notes deficiencies and problems within STARS and assists in making corrections and improvements to the system. The SAC also assists in maintaining and improving the system based on requests for assistance from the Missouri Highway Patrol staff responsible for its operation.

**Offender-Based Transaction Statistics (OBTS)/ Computerized Criminal History Records: Phase II**

This project involves upgrading the Missouri Criminal History Records System (CHRS) OBTS component based upon the recommendations published in the SAC report entitled Missouri CHRS/OBTS Problem Analysis. Standardized reports will be developed using currently available OBTS data from the CHRS.

**Post Student Evaluation Surveys**

The SAC will assist the Department of Public Safety with the design and implementation of an on-going student evaluation program for all academy law enforcement pre-service training programs throughout the State of Missouri. The SAC will assist in development of information flow processes. In addition, the SAC will develop a series of output reports to be used by the Peace Officer Standards and Training Program (POST) Commission as well as individual academies.

**Missouri-Montana**

**Crime in Montana**

This annual report provides information on crime in the State of Montana as reported to law enforcement agencies.

**Directory of Criminal Justice Agencies**

The Planning and Research Bureau publishes this annual directory of all criminal justice agencies in the State of Montana.

**Five Year Study of Multi-Jurisdictional Task Forces**

The SAC produces a summary of five years of data taken from multi-jurisdictional task forces.

**Juvenile Probation Information System (JPIS)**

The JPIS collects data on the activities and workload of the Montana youth courts and then provides the courts with management information in the form of summary reports. The system operates via voluntary participation.

**Law Enforcement Manpower in Montana**

Statistics on law enforcement manpower in the State of Montana are presented in this annual report.
Montana Crime Victims Unit Fiscal Year Annual Report

Statistics on crime victims and annual costs in the State of Montana are presented in this report.

NEW MEXICO

Child Homicide Study

In an attempt to overcome a lack of systematic, reliable data in the study of child abuse, the New Mexico SAC is studying child homicide rates using three main sources of data: police, courts, and the Coroner's Office. The SAC is studying all cases of child homicide over a 10-year period involving victims less than 16 years old. Homicide data are examined for the purpose of identifying groups of children that are highly at risk of child abuse and homicide.

Citizen Satisfaction with Police Service

The SAC contracted with the Albuquerque Police Department to collect survey data from a random sample of approximately 900 Albuquerque residents. Telephone interviews were used to study citizens' satisfaction with police service delivery, citizens' fear of crime and its impact on their lives, and criminal victimization experiences. A final report was prepared and circulated both to the Albuquerque Police Department and other departments in the State of New Mexico.

**DUI Legislation and Media Coverage of DUI Issues**

This project examines the nature and impact of media coverage of DUI issues in two cities (Phoenix and Albuquerque) between 1979 and 1985. All articles on DWI in the two Phoenix newspapers have now been collected, and collection of the Albuquerque articles is under way. Data are also being collected on legislative changes regarding DWI and the prevalence of DWI and DWI-related accidents in Arizona and New Mexico. Two issues will be addressed: the nature of media coverage and the impact of media coverage on the prevalence of DWI.

**Mediation and Adjudication**

In 1990 the SAC began participating with the Bernalillo County Municipal Courts and the University of New Mexico (UNM) Law School on a project that will provide basic statistics on cases being processed by the municipal courts through adjudication or mediation. The primary purpose of the project is to determine whether adjudication processes are substantially different from mediation processes. The study is limited to Bernalillo County, the county which includes Albuquerque and about 40% of the State's population. The SAC has assisted the courts in collecting data on 500 mediated and 500 adjudicated cases and is currently working with the UNM Law School to analyze the data and prepare a report.

**A Strategy for Action Against Gun-Related Violence**

The strategy is a multi-faceted, detailed plan of action designed to: (1) limit the availability of firearms to those who would use them illegally or irresponsibly; (2) hold accountable individuals who commit crimes involving firearms; (3) promote greater firearm safety, and (4) develop positive alternatives to gun-related violence.
Anti-Drug Abuse Strategy Report
This annual report summarizes progress on New York State anti-drug initiatives in criminal justice, prevention, and treatment and delineates plans for the coming years. Among the priorities are the development of a statewide anti-drug media campaign; intensified targeted drug prevention; drug enforcement programming; development of day treatment centers for offenders sanctioned in the community; increased civil penalties for drug users; and expansion of drug treatment slots.

Automated Criminal Justice Indicators System (ACJIS)
A personal computer-based information system for use by executive criminal justice decision makers in New York State, ACJIS replaces an older, paper-based data digest. ACJIS, when fully developed, will present ten years of aggregate data, covering system activities by county. Data will be included on crimes reported, arrests, indictments, prosecutions and sentences. Information will also be included from local jails, probation, State prison, and parole. Date will be available by year or quarter for numerical or graphic display.

Bias Crime Incident Reporting Program (BCIRP)
The SAC is developing a program to obtain data on all incidents of bias-related offending reported to law enforcement agencies throughout the State. This program involves developing reporting procedures, recruiting new police agencies to participate, training these departments, developing a database, and analyzing and publishing statistical information from reporting agencies. The project also serves as a general resource center on other issues related to bias-related offending.

Crime and Justice Annual Report
A broad range of criminal justice information is collected, analyzed, and presented in this report, including offense and arrest data provided by law enforcement agencies and indictment, disposition, and sentencing information reported by district attorneys. Data are also presented from a variety of State agencies, covering parole, probation, parole, and State corrections, courts, juvenile processing and corrections, and crime victims.

Data Sources: UCR/IBR, CCH, Jail Information System, Probation/Parole, Juvenile Information System, Corrections Department, Courts, Prosecutors, Police Departments, OBTS, Sheriffs Departments

Executive Park Tower, 8th Floor Stuyvesant Plaza Albany, NY 12203

COMBAT Evaluation
COMBAT (Coordinated Omnibus Municipally Based Antidrug Teams) combines elements of community policing with more traditional antidrug enforcement efforts. It focuses on the development of local partnerships in which community members are encouraged to identify and participate in the efforts best suited to the specific crime and drug problems evident in a selected target area. A Preliminary Review of New York State COMBAT Programs describes the basic program strategies developed in thirteen program sites across the State, distills a COMBAT model from the program descriptions, and makes recommendations concerning future program development, monitoring, and evaluation efforts.

Drug Trafficker Migration

It has frequently been alleged in the news media that drug traffickers are migrating from New York City into communities in upstate New York, and that this migration accounts for much of the increase in violent crime in those communities. A pilot project was undertaken to assess the feasibility of tracking drug trafficker migration using self-reported address information recorded in the State’s Computerized Criminal History system.

(518) 457-8381

Environmental Offending Project

The SAC will examine (1) the various data systems used to track environmental offenses related to hazardous, medical, and solid waste and (2) the types of data that are available. The SAC has developed resource materials to enhance standardization in reporting, including a summary of Environmental Conservation Laws and New York Code Rules and Regulations related to the topic and a dictionary of terms. The criminal and civil administrative justice systems’ response to environmental offenses will be examined.

Felony Case Processing Trends: Controlling for Case Seriousness

This research examines the reasons for the dramatic increases in New York State’s prison population during the 1980’s. The increases were almost entirely attributable to increases in the number of felony drug arrests, increases in the probability of felony conviction given a felony drug arrest, and increases in the proportion of felony defendants who had prior felony convictions. There was no increase in the average seriousness of cases presented to the courts, and no increase in the rate at which comparably situated convicted felons were sentenced to prison. Detailed explanations of the methods and findings are reported in a monograph entitled Drugs, Prosecutors, Predicate Felons, and Prison Beds: A Description of Changes in Felony Arrests and Felony Case Processing Decision in NYS, 1981-1989.

Data Sources: CCH, OBTS

Missing Children
The SAC developed and maintains a statistical database derived from the statewide Missing Children Register. Missing Children is an annual report published in cooperation with the Missing Children Clearinghouse which coordinates program activities including the Register. This report describes the number and characteristics of missing children cases reported to the Register during the calendar year; the nature of each disappearance; and circumstances of recovery. In addition, periodic summaries of cases are available from the database each year.

**Research Methods**

The SAC frequently develops new research methods or extends existing methods in order to expand its research capabilities. During 1992, SAC staff developed a new measure of case seriousness (based on expected days incarcerated given arrest for each combination of offense type and prior record score), and developed a new unit of count (dubbed "concurrent ring") that treats a set of cases that overlap in time as a single, concurrent entity. The new seriousness score was used as a control variable in analyzing felony case processing trends. Both the seriousness score and concurrency rings are now being used in a study of racial disparity in felony processing.

**Recidivism Studies**

The SAC is expanding its program of recidivism research. This research addresses two closely related aspects of recidivism: comparative recidivism research compares recidivism rates across time periods and among sanction types, using statistical controls, experimental designs, and quasi-experimental designs to reduce selection artifacts to the extent feasible; and risk assessment research examines the association between recidivism rates and offenders' personal characteristics and criminal histories. Current projects include assisting the New York City Department of Probation in their assessment of the impact of a complete restructuring of probation supervision, as well as developing data sets to support the construction of a new risk assessment instrument.

### State Reporting and Evaluation Program (SREP)

The Criminal Justice Analysis Center is participating in the State Reporting and Evaluation Program, which is coordinated by the Justice Research and Statistics Association through a grant from BJA and which will assess the impact of the Anti-Drug Abuse Act funds. Emphasis in North Carolina will be on the reporting and evaluation of the State's formula grant strategic plan.
Study of Violent Crime Patterns and Trends in North Carolina

In May 1991 the Criminal Justice Analysis Center initiated a study of violent crime patterns and trends in North Carolina. In cooperation with other staff members of the Governor's Crime Commission and the SAC's and State Administrative Agencies from other southeastern States, the study has been expanded to include all states and territories in the southeastern region of the United States. A detailed assessment of the nature and scope of the problem and the development of program strategies was completed in November 1992. A regional conference on violence in the Southeast was held at that time to formally review the program assessments and coordinate strategies for violence reduction.

Peace Officers Licensing Information System (POLIS)

This system maintains training and law enforcement employment records for approximately 1,800 officers across the State; monitors compliance with licensing requirements; and documents attendance at certified training programs. Officers must attend 48 hours of certified law enforcement training every 3 years and must satisfactorily complete an annual sidemount certification course to maintain a peace officer license. The system has been designed to notify officers of possible shortfalls in training hours and of delinquencies in renewing licenses.
**Report on Arrests and Incarcerations for Driving Under the Influence**

DUI arrests, incarcerations, and convictions are compared from 1978 to the present. Major legislative changes were initiated in 1983 to increase penalties and place mandatory penalties and administrative actions on arrests for DUI for which the Blood Alcohol Content limits are exceeded.

Coordination of the Development of Criminal Justice Data Systems

The SAC, under the auspices of the Lieutenant Governor and the Attorney General, coordinates the Criminal Justice Information Systems Steering Committee, which organizes the growing number of data system projects and ensures that the State does not become the repository for a segmented, mutually exclusive group of systems. The Committee will also give direction to Ohio's 5% set-aside program aimed at upgrading the CCH. In May of 1993, the steering committee conducted a 2 day retreat which established CJIS direction in Ohio for the immediate future.

Drug Project Monitoring System Report

The SAC is upgrading and redesigning the way projects funded through OJJDP are evaluated.

Drug Task Force Commander's Survey

The SAC is administrating a study of 18 multi-jurisdictional task force operations in Ohio.

DNA Research

DNA development in Ohio is primarily the responsibility of the State Bureau of Criminal Identification and Investigation. The SAC produces periodic briefs concerning the status of the program implementation, State of the art technologies in the field, and implications for policy.

DNA Sources: State Bureau of Criminal Identification

Drug Testing Policy

The SAC is writing a report on drug testing policies within Ohio's criminal justice system.

Data Sources: Survey

Evaluation

This project will establish Ohio's evaluation methodology for drug task forces via the use of arrest and conviction data to determine the extent to which the task forces are impacting higher levels of drug offenders. The project also encompasses all other potential evaluation activity in the agency, including what appears to be a significant effort to evaluate treatment programs linked to the Departments of Rehabilitation and Correction, and Youth Services.

Data Sources: Survey, Courts, UCR/IBR, Offender Treatment Projects

Grantsmanship Training

Dr. Davis conducts one day training sessions on how to effectively find and secure crime and justice grants.

Data Sources: BJA, GOCJS

44
Juvenile Data Network
This project is coordinated by the staffs of the SAC and the Supreme Court and is aimed at ultimately establishing a statewide automated information system. A four jurisdiction pilot project is anticipated in 1993-94.

Police Behavior Study
This study involves the survey of 800 police officers in Ohio as well as a comparable number of citizens to examine police issues of ethics and misconduct and to evaluate appropriateness of the discipline or punishment. The project is being done in conjunction with the Illinois SAC which is conducting a parallel State study using the same two instruments. Data was gathered from some 700 officers who completed the instrument in the Spring of 1993.

OKLAHOMA

Crime Alert

Crime Alert is a monthly bulletin that identifies high-risk offenders released from correctional facilities. The offenders listed in the bulletin are recent releases who may pose a threat or danger to the community. Crime suspects and prison escapees are also included. Crime Alert is now published by the Oklahoma Department of Corrections.

Oklahoma Criminal Justice Research Consortium

In July 1992, sixty-two representatives of public and private colleges and universities met and agreed to form a research consortium to assist criminal justice policy makers and legislative leaders in the evaluation of programs and the identification of new programs. Using a list of critical corrections issues as the initial agenda, the consortium issued Requests for Proposal addressing thirteen corrections issues. Twenty-two research proposals were funded, addressing a wide variety of criminal justice issues. The research findings will be available to decision makers in the spring of 1993. A survey of criminal justice issues was initiated. The results of this survey will set the agenda for 1993 and 1994.

Oklahoma Safety and Security Grants Clearinghouse

The purpose of the Grants Clearinghouse is to help State safety and security agencies develop non-traditional sources of funding; develop grantmanship capabilities within each agency; and secure grants, donations and other non-traditional funding. It will also coordinate efforts between agencies to maximize Federal, State, and non-traditional funding resources. Grantmanship training was sponsored for agency grant writing teams. A reference library containing grant issuers is also maintained. Quarterly updates of grant availability, references, and available training resources are mailed to all member agency heads and clearinghouse members.

Multi-Jurisdictional Task Force Profile
The SAC is conducting an analysis of multi-jurisdictional task forces in the State.
Prison and Parole Population Projections

The SAC is presently engaged in a collaborative project with the Department of Corrections, the Commission on Sentencing, the Board of Probation and Parole, and the Office of the Budget to produce a unified set of prison and parole population projections. The immediate goal is to produce both projections and impact analyses to aid in correctional planning and policy decisions. The long-term goal is to develop a computer-based simulation model that would rely on the databases available from each agency.

Domestic Violence

The Governor's Justice Commission's SAC is working closely with the Rhode Island Coalition Against Domestic Violence (RICADV) to form a unique State-Private study development. This is a first of a kind in Rhode Island in that both groups will be credited for developing a comprehensive report concerning: problems, programs and projects in place, procedures, statistics, future commitments and plans. The RICADV will generate text, statistics, etc.; the GJC/SAC will generate national and regional text, statistics, etc.

Date of Completion: 10/1992
Agency: Governor’s Justice Commission
Contact: Norman Dakake (401) 277-2620

Offender Population Projections: Rhode Island Department of Corrections

The National Council on Crime and Delinquency (NCCD) has developed an Inmate Population Projection Model for the Rhode Island Department of Corrections (RIDOC). In addition to providing long range population projections of various offender sub-groups, the model may be used to assess the probable impacts of proposed policy and legislative changes. Initial base projections were produced by NCCD in March 1990, and transmitted to RIDOC. The projections contained in the report represent the first update of those initial projections and are based on more recent data supplied by RIDOC staff on offender characteristics and movement of offenders into, through and out of the RIDOC system. These updated projections are significantly lower than those issued in March 1990 due primarily to two issues: (1) lowered estimates of future intakes into the system over the next 10 years and (2) significantly reduced length of stays in the waiting trial population. The report contains projections of the incarcerated sentenced population (prison) and the parole supervision population. Additional information is presented on the NCCD projection methodology, offender trends and Rhode Island Sentencing structure.

Rhode Island Comprehensive Criminal/Juvenile Information

Rhode Island is implementing a comprehensive, coordinated criminal justice information system to enable the State’s major criminal justice agencies, the Department for Children and their Families, the Registry of Motor Vehicles, and the Governor’s Justice Commission to (1) purchase state-of-the-art computer equipment for their specific agency and (2) join together in a "hub" for the rapid exchange of common data information. A three person Oversight Committee has been appointed by the Governor to direct the activities required of the "Rhode Island Comprehensive Criminal/Juvenile Justice Information Systems Plan." Further, a consulting firm (Maximus, Inc.) has been chosen to assist in implementing the project which will last approximately three years commencing on January 1, 1991.

Unauthorized Aliens: Immediate Response to Emerging Problems

The State of Rhode Island’s Governor’s Justice Commission received a $200,000 special grant from the U.S. Dept. of Justice’s Bureau of Justice Assistance. In turn, the GJC will subgrant the entire funding amount to the Department of Corrections for development and completion of this project. This grant will allow the State of Rhode Island to systematically identify, locate and remove aliens not authorized to remain in the United States because of criminal activity. The Federal funding will also ensure the expeditious deportation of convicted criminals, consistent with due process requirements.

UCR Design (IBR)

This project will establish Incident-Based Reporting (IBR) in South Dakota. Under this system, the State will be adding more data elements than the FBI's 53 required elements. Because of the detailed nature of the data, collection will need to be automated primarily in the transmissions from local law enforcement to State agencies. This project will assist local agencies by training officers in the collection of the necessary data and by supporting those agencies in establishing automated systems to maintain the data. The project will also involve the development of the State-level system to accommodate the transmissions of data from local agencies and the statistical manipulation of the data.

TEXAS

Criminal Justice Information System Implementation

The SAC develops and oversees the strategic plans for implementing the Criminal Justice Information System (CJIS), which links the Computerized Criminal History (CCH) and Correctional Tracking System (CTS) to track offenders through the criminal justice system. Electronic reporting linkages with counties are also being developed to improve court disposition information and to update the State records more effectively. To thoroughly review implementation and build a consensus with State policy makers, the Criminal Justice Policy Council conducted a workshop and organized technical groups to work on the design and implementation of CJIS. In 1992 the Criminal Justice Policy Council, in conjunction with the Texas Department of Public Safety and the Texas Department of Criminal Justice, hosted three regional public hearings to address local issues concerning CJIS implementation.

Drug Abuse Data Collection and Analysis

The Criminal Justice Policy Council has been designated to conduct the evaluation of State law enforcement Anti-Drug Abuse programs. The Policy Council designed a data collection form for distribution to all grantees receiving Anti-Drug Abuse funds. Case-tracking data on all persons arrested are being collected, allowing comparisons with non-grant-funded jurisdictions' Anti-Drug efforts. Follow-up studies of time served in prison and time served in alternatives to incarceration will be conducted to determine the effectiveness of punishment.

Justice Model

The SAC developed a PC-DOS-based, discrete event simulation model for JUSTICE, the adult corrections system. The model works with computerized records of prisoners and parolees to replicate the movement of offenders through the system. The key characteristics in the record of each offender (for example, offense and sentence) determine the flow of the offender through the system by triggering certain rules or laws (such as parole eligibility) that affect the offender's movement. Simulating the movement of every inmate currently incarcerated and every inmate expected to enter prison over the next 10 years allows for accurate projections of the jail backlog, prison, and parole populations. The model also integrates a projection model using aggregate data to project the probation population under supervision. Subroutines in the model, representing specific levels of detail, allow for comprehensive "what if" systemic simulations. JUSTICE provides the SAC with the modeling capabilities to generate policy options for elected officials. Projections from the model have already been used as the basis to fund increased diversionary and prison capacities for the Texas correctional system.

Inmate Population Projections

This activity involves the development, monitoring, and enhancement of projection methodologies available for forecasting correctional populations of the Commonwealth. While particular attention is given to local correctional populations, trends in prison populations, demographic shifts, and policy assessments also are measured.

Data Sources: Corrections Department, Courts, Jail Information System, OBSCIS, OBTS, Probation/Parole, UCR/IBR
Date of Completion: Continuing Activity
The Criminal Justice Research Center answers numerous requests for special data analyses from the Department of Corrections, the Parole Board, the State Police, the State legislature, the judiciary, and local criminal justice agencies. These analyses focus on issues such as jail and prison crowding, probation, the Automated Fingerprint Identification System (AFIS), firearm laws, victim impact statements, and habitual offenders.

**Public Opinion Survey on Violent Crime and Gun Control Issues**

The Criminal Justice Research Center, in conjunction with the Virginia Commonwealth University Survey Research Laboratory, conducted a statewide public opinion survey which addressed issues currently being debated among policy makers in Virginia's executive and legislative branches of government. This survey collected valuable information concerning the public's opinion on sentencing, parole, juvenile records, and specific gun control proposals. The survey data analysis was published and presented to various bodies in order to help inform public policy making.

**Data Sources:** Survey

**Date of Completion:** 01/1993

**State Reporting and Evaluation Program (SREP)**

The SAC is participating in this national effort to collect standardized criminal justice data elements that will help assess the impact of various crime control initiatives. Data on arrests, task forces, offense type, seizures, and crime labs are collected, integrated, and then provided to the Justice Research and Statistics Association for further analysis. This project allows Virginia to compare its anti-crime efforts across jurisdictions and to make further comparisons with other participating States. The most recent cross-jurisdictional program the SAC participated in was the Task Force Commanders Survey.

**Data Sources:** Police Departments, Prosecutors, Sheriffs, Courts, UCR/IBR, State Crime Labs

**Date of Completion:** Continuing Activity

**Survey of Offender Use of Firearms**

Inmates entering Virginia Department of Corrections prisons and juveniles entering certain Department of Youth and Family Services facilities are being surveyed to examine their experience with firearms, particularly during criminal activities. These individuals are asked to identify their reasons for using (or not using) firearms in criminal activity, how and where they obtained their firearms, types of firearms they used in their activities and reasons they selected the types of firearms used. They are also asked about their knowledge of Virginia laws which enhance penalties for offenses committed with a firearm. Survey administration started in November 1992 and was completed in June 1993. The data will be used to guide firearms-related policies in Virginia.

**Data Sources:** Surveys

(804) 785-8449

**Virginia Robbery Database**

Pre/post-sentence investigation (PSI) reports on all robbers sentenced in 1991 were examined to determine the extent of robberies in Virginia and to identify characteristics of these crimes and individuals who committed them. Data from 892 PSI reports for robbery sentences were examined and automated, including detailed data from narratives. Data was collected on robbery characteristics such as location of robbery, role of robbery participants, weapon(s) used, drug use by offender(s), types of victim(s) and victim(s) injuries. Information obtained has been used to study characteristics of convenience store robberies. The database will provide information for further studies of robberies in Virginia.

**Data Sources:** Pre/post-sentence investigation reports

**Date of Completion:** 10/1992

**Implementation of Criminal Justice Information Act**

The SAC is required by State law to develop and implement criminal justice information systems and improve criminal history reporting. The SAC chairs and provides staff to a committee of State and local officials for the purpose
of developing justice information policy, administering the funding of justice information projects, and implementing the statewide justice information strategic plan.

**Data Sources:**
- OBTS, Jail Information System, Juvenile Information System, Corrections Department, Courts, Prosecutors, Police Departments, AFIS, CCH, Sheriffs Departments, UCR/IBR

**Inmate Population Forecast**

This annual project produces a 180-month forecast by crime type, sex, and admission authority. The forecast is a cohort simulation model comprised of several components including: a phase out of the existing population, a forecast of convictions and admissions to prison, a forecast of releases, and a forecast of re-admissions to prison. This project is a budget driver forecast that determines State funding for the State Department of Corrections.

**Data Sources:**
- Corrections Department, OBTS, CCH, Courts, Jail Information System, Police Departments, Prosecutors, Sheriffs Departments, UCR/IBR, State Population Forecast

**Juvenile Rehabilitation Institutional Population Forecast**

This project produces a 240-month forecast of juvenile inmates by crime type and age. The forecast is a cohort simulation model, based on admission and length of stay data. This project is a budget driver forecast that determines State funding for State juvenile institutions.

**Data Sources:**
- UCR/IBR, Juvenile Information System, Courts, Police Departments, Prosecutors, Sheriffs Departments, State Population Forecast

**Mental Health Institutional Population Forecast**

This annual project produces a 180-month forecast of mental health patients by admission authority, treatment unit and hospital. The forecast is a cohort simulation model, based on admission and length of stay data. This project is a budget driver forecast that determines State funding for mental health hospitals.

**Data Sources:**
- Health Related Facilities

**Sentenced Felon Jail Forecast**

This annual project produces a 15-year forecast of the population of sentenced jail felons in the local jails every other year, as required by Washington State law.

**Data Sources:**
- CCH, Corrections Department, Courts, Jail Information System, Juvenile Information System, Police Departments, Probation/Parole, Prosecutors, Sheriffs Departments, UCR/IBR

**WEST VIRGINIA**

**Crime Against the Elderly**

The Crime Against the Elderly study is based on a survey of elderly West Virginians over the age of 60 years. The study analyzes the results of the surveys to determine the state of crime against the elderly in West Virginia as well as the perceptions about crime against the elderly held by West Virginians over the age of 60 years.

**Data Sources:**
- Survey

**Crime Victimization Survey**

The West Virginia SAC coordinated a crime victimization survey in preparation for the Southern States Violent Crime Summit. The SAC developed the survey, completed 1,200 phone responses, created data sets on violent crime and prepared a report.

**Data Sources:**
- UCR/IBR

**Criminal Justice in West Virginia Journal**

This annual report on crime statistics provides information on the characteristics of crime in West Virginia and across the Nation and on yearly SAC research activities.
Data Sources: Corrections Department, Health Related Facilities, Jail Information System, Juvenile Information System, Police Departments, Probation/Parole, Prosecutors, Sheriffs Departments, Survey, UCR/IBR

INDEX OF CRIMINAL JUSTICE ISSUES

The index on the following pages of the Directory allows for quick access to the activities listed in Section II. The index contains a list of the 38 content areas designated in our clearinghouse, the Computerized Index to Data Sources (CIDS), in alphabetical order. Below each content area is the name of the originating state, the titles of the activities which focus on the content area, and the page on which the complete description of each activity can be found. This list does not encompass all topics concerning criminal justice. Contact JRSA directly for a more detailed search CIDS.

GEORGIA

Robert Friedmann, Ph.D.
Director, Statistical Analysis Bureau
Department of Criminal Justice
Georgia State University
1276 Urban Life Building
Atlanta, GA 30303
Phone: (404) 651-3515
Fax: (404) 651-3658

ALASKA

Allan Barnes, Ph.D.
Director, Statistical Analysis Center
Alaska Statistical Analysis Unit
Justice Center
University of Alaska Anchorage
3211 Providence Drive
Anchorage, AK 99508
Phone: (907) 786-1810
Fax: (907) 786-7777

CONNECTICUT

Dolly Reed
Director, Statistical Analysis Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
Phone: (203) 566-3522
Fax: (203) 566-1589

HAWAII

Alan Shimabukuro
Administrator, Crime Prevention Division
Department of the Attorney General
810 Richards Street, Suite 701
Honolulu, HI 96813
Phone: (808) 586-1416
Fax: (808) 586-1424

ARIZONA

Roy Holt
Director, Statistical Analysis Center
Arizona Criminal Justice Commission
1501 West Washington, Suite 207
Phoenix, AZ 85007
Phone: (602) 542-1926
Fax: (602) 542-4852

DELAWARE

John O'Connell, Jr.
Director, Statistical Analysis Center
60 The Plaza
Dover, DE 19901
Phone: (302) 739-4846
Fax: (302) 739-4630

IDAHO

Dawn Burns
Director, Statistical Analysis Center
Idaho Department of Law Enforcement
6111 Clinton Street
Boise, ID 83704
Phone: (208) 327-7170
Fax: (208) 327-7176

ARKANSAS

Larry Cockrell
Manager, Special Services
Arkansas Crime Information Center
One Capitol Mall
Little Rock, AR 72201
Phone: (501) 682-2222
Fax: (501) 682-7444

DISTRICT OF COLUMBIA

Robert Lester
Office of Criminal Justice Plans and Analysis
717 14th Street, N.W., Room 500
Washington, DC 20005
Phone: (202) 727-6554
Fax: (202) 727-1617

ILLINOIS

John Firman
Associate Director
Illinois Criminal Justice Information Authority
120 South Riverside Plaza, Suite 1016
Chicago, IL 60606
Phone: (312) 793-8512
Fax: (312) 793-8422

CALIFORNIA

Quint Hegner
Program Manager
Bureau of Criminal Statistics and Special Services
Post Office Box 903427
Sacramento, CA 94203
Phone: (916) 227-3531
Fax: (916) 227-3880

FLORIDA

Diane Zahm, Ph.D.
Administrator, Statistical Analysis Center
Criminal Justice Executive Institute
2331 Phillips Road
Post Office Box 1489
Tallahassee, FL 32302
Phone: (904) 487-4808
Fax: (904) 487-4812

INDIANA

Director
Center for Criminal Justice Research and Information
Indiana Criminal Justice Institute
302 West Washington Street, Room E-209
